

Technical Datasheet: HP500N

Product Description:

Moplen HP500N is a medium-high fluidity polypropylene homo-polymer. Moplen HP500N is particularly suitable for the production of heavy denier staple fibre & continuous filament. Moplen HP500N exhibits good process stability & constant, high flow during extrusion

Applications:

Moplen HP500N is developed for the extrusion of staple fibres for spinning wool system fibres for carpets, rugs & garments such as overalls & socks. Moplen HP500N is also suited for the production of continuous filament for ropes, belts & straps. Another typical application of Moplen HP500N is the extrusion of decorative ribbons.
